# EXEMPLARY MOTHERS.

There is a sweet and simple custom prevalent in Iceland which mark the habitual devotion of its inhabitants. Whenever they leave home, though for a short journey, they uncover their heads, and for the space of five minutes, silertly implore the protection and favor of the dation of political happiness, a confidence in the Almighty. Dr. Henderson, from whom the integrity of man; the foundation of all happiness. fact is derived, and who observed it in the Icefunders who often attended him on his excur- of God. sions, also remarked it in the humblest fishermen when going forth to procure food for their families. After having put out upon the sea they like at one time last week. It cost about 90 cofrom the shore, and bowing their uncovered heads, solicit the blessing of their Father in Heads. Even at passing a stream, which in their country of prejudices is often an operation franght with danger, they observe the same sacred custom. This affecting habit of devotion has been imputed to the fact, that from their isolated situation, and mode of life, the mother is almost the only teacher, and her instruction seems to have become incorporated with their very elements of being.

The passage of the teeth through the gur produces troublesome and dangerous symptom it is known by mothers that there is great irr It is known by mothers that there is great irritation in the mouth and gums during this process. The gums swell, the secretion of the salviva is increased, the child is asized with frequent and sudden fits of crying, watching, starting in its sleep, and spasms of peculiar parts; the child ismricks with extreme violence, and thrusts its fingers into its mouth. If these precursary symptoms are not speedily alleviated, spasmodic convulsions universally supervene, and soon cause vulsions universally supervene, and soon course the dissolution of the infant.
